INTRODUCTION

Horizon Facilities Management & Landscaping L.L.C. is an established landscaping business company in UAE since 2010 that provides efficient and professional landscaping services, and offers unlimited fresh ideas to enhance the environment.

Our passion for plants as well as a holistic approach to landscaping, is what energizes our teams to create a balanced and beautiful environment that injects both color and life into private, public and commercial spheres of the UAE.

Horizon LLC is committed to the improvement of homes and businesses throughout the UAE by providing a full range of landscaping services starting with design to planning, construction and execution and continuing with maintenance.

Our ability to provide our clients with a total landscape services, we will continue to be our clients' preferred choice: starting from the initial concept plans through to a complete constructed landscape.

We pride ourselves in, cleverly fusing the latest irrigation systems, construction techniques and landscape finishes to create a sustainable and contemporary landscape environment.

Our specialist team is made up of committed and passionate designers, engineers, architects, landscapers, project managers and horticulturalists who strive to make a positive difference every day in each and every project.

We are continually investing in the training and development of our staff, the research and development of our methods, and the regular audit of our performance to the highest international standard.

landscaping is a thrill...

SOFT LANDSCAPE

We are passionate about creating and maintaining green landscapes that bring vividness and life to the places where our customers live and relax. Well designed landscapes will enrich the aesthetic value of your space, adding to it a charm and beauty, thereby creating a positive impact on the living environment. We aim to provide bespoke solutions to ensure our Customers needs and expectations are fully met.

Creating Soft Landscapes we provide services covering:

- Advisory on horticultural and technical aspects of the landscape design;
- Choosing relevant plants and flowers taking into considerations its grouping sun, soil and water.
- Requirements and Physical features;
- Providing with high quality lawns and grass seeding;
- Improving fertility of the soil;
- Hedging and planting diverse species of trees and shrubs from local nurseries.
- Alignment to climatic conditions
- Theme Gardens Designs: i.e Rose; Fruits/Vegetables; Vines; Seasonal; Palms;
- Ground covers and turfing
- Irrigation systems designs implementation and maintenance;
- Maintenance of the door plants and landscape.
- Creating soft landscapes we provide services covering
- We are passionate about creating and maintaining

HARD LANDSCAPE

Enriching the landscape with pathways, paved additions, stones and hard landscape architecture assures better utility of space and convenience for people to enjoy the open space. Analysis of natural features of the place and choosing the right materials to match the design will enhance the durability and sustainability of the landscape design leaving a positive impact on local community and the environment.

landscaping is a thrill...

Designing Hard Landscapes, We Provide services covering:

- Construction of pathways, paved additions, walls, settings;
- Design and installation of panoramic walls and fences;
- Design and installation of feature wooden, stone or metal elements;
- Creating structures such as pergolas, gazebos, terraces;
- Creating sport grounds such as tennis courts, basketball courts, football pitches, children's playground, etc.
- Building open and covered parking squares;
- Earth works - evocation works; works on soil, sub base and subgrade;
- Design and installation and maintenance of swimming pools;
- Supplying all types of granite stones, sandstone, York stones, pebbles, slates and tumbled stones;
- Providing rockery materials, feature stones and standing stones.

Irrigation System:

Maintaining beauty and utility of soft and hard landscapes in a hot and arid Middle East climate is one of the biggest challenges. We address these challenges with design and implementation of sustainable and cost-effective irrigation systems and smart sensors that help to keep the landscape environment vivid and green. While designing irrigation systems we consider all the natural aspects like sun direction, shade exposure, ground slope, soil type, evapotranspiration, individual plants demand and after use which make our irrigation systems truly optimal, sustainable and environmentally friendly.

landscaping is a thrill...

Irrigation Systems and Services, We Offer:

- Designing sustainable irrigation networks and ensuring continued vitality of green areas;
- Planning an optimal irrigation network type (automatic or centralized irrigation system);
- Installation of landscape irrigation networks and maintenance
- Water quality testing and treatment;
- Rain water drainage

Systems we implement and types of irrigation sensors we use:

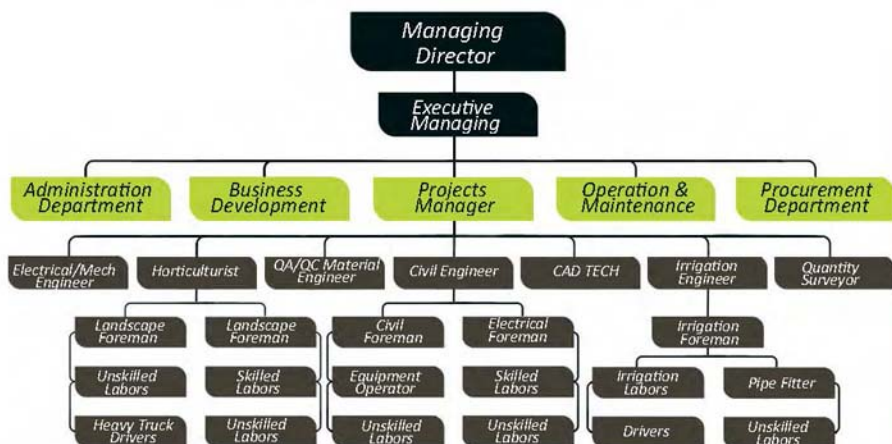

- Flow sensors
- Moisture sensors
- Rain sensors
- Wind sensors
- Sprinkler Irrigation;
- Drip Irrigation
- Bubbler Irrigation
- Sub Surface Irrigation

COMPANY STRUCTURE ORGANIZATIONAL CHART

landscaping is a thrill...

1 - Soft/Hard Landscape & Irrigation Construction Department:

This department is formed with highly qualified engineers, foremen, skilled workers and machine operators who have the necessary skills as well as resources for performing timely and efficiently.

landscaping is a thrill...

2 - Design Department:

This department incorporates the design of hardscape, softscape and irrigation as well as quantity surveying and drafting.

3 - Estimation Department

In this department, specialized personnel study in details client requirements, project details and limitations and job information and work closely with projects managers to ensure accurate and timely submittals and designs.

landscaping is a thrill...

3 - Post Execution/Maintenance Department:

Maintenance is a vital part in landscaping. No matter how well designed and implemented a landscaped area is maintenance is required to keep executed projects at the highest standards.

The maintenance team involves engineers and foremen that have a prodigious experience in maintaining landscaped areas and are equipped with all the necessary equipment, tools and chemical products needed for the job.

Maintenance contracts can be offered to clients in different options from turn key to regular and consulting. Maintenance treatments are based on preventive as well as curative programs to ensure that landscaped areas are at their best throughout the seasons.

4 - Interior Landscaping & Maintenance Department:

A specialized team of professionals will turn your corporate or residential areas into a green paradise. The team creates a customized design to each and every space that will meet the taste and the need of clients.

The maintenance of landscaped areas is handled by a well-trained and experienced team to make sure that all activities are performed without any disruption and in coordination with the client's designated personnel.

Scheduled visits will be performed regularly and reports summarizing all activities and remarks will be presented to clients' representatives.
